

June 3, 2020

Meaningful Day Services is developing a process to reopen our centers and clinics. We have been preparing our centers and are looking forward to the opportunity to see individuals in-person in the near future. If you were previously receiving services at any of our offices, you will be contacted by your service provider to discuss timelines.

Many of our services will continue to be offered via telehealth options. If you need assistance accessing devices for telehealth services, please contact us at 317-858-8630.

To our clients, you may be receiving multiple services with Meaningful Day Services. During this transitional time, delivery of these services may vary from service to service. Some of your services may continue via telehealth and some may resume to in person. We want your input and will work with you to provide a safe plan for all involved. We value the safety of you, our employees, and our community at large.

We continue to support our community as we closely monitor the Indiana "Back OnTrack" plan outlined by Governor Holcomb. We are incredibly proud of our employees who have been diligent in their efforts to provide quality services in unique ways during this time.

Thank you for your patience as we properly plan for our future.

Sandra Miller, CEO
